

Web Design Metrics

Robert Woolley
Chief Technical Architect
State of Utah
June 10, 2013

“Simplicity is the ultimate sophistication.
- Leonardo da Vinci”

The most successful websites are those that strike a balance between form and function.

Design elements should support the usability of the site rather than detract from it.

Web Design Trends

1. Use of CSS3 and HTML5
2. Data Integration
3. Design Simplification (Reduce complexity!)
4. Geo-location
5. Immersive Content
6. Interactive Use of Maps and Data
7. Real Time Information
8. Responsive Design
9. Site Search
10. Social Media Integration

Utah.gov Technologies

- Browser and Device Independent
- CSS3, HTML 5, JavaScript, and JQuery
- Database driven (MySQL)
- Geocoding of Online Services
- Search Centric (649 sites included)
- GlassFish Application Server

Utah.gov Design Criteria

- Entry point for Government services
- Citizens should not have to navigate government to find services
- Accessibility Matters
- Visually Impactful
- Driven by data

Basic Questions!

1. Is the site accessible?
2. Is the site secure?
3. Does the design enable usability?
4. Responsive design? Platform / browser neutral?
5. Is the site search friendly?
6. Does it align with expectations?
7. Is help / customer feedback enabled?

Website Goals Matter!

*Begin with the end
in mind?*

Top 5 Goals

- Make it easier for citizens to interact with all levels of government
- Help agencies reduce costs of services
- Support business objectives of policy makers
- Deliver a positive image of Utah that supports economic growth and tourism
- Deliver services that meet the requirements of bills passed by the Legislature

What do we know?
Why do metrics matter?

Unique Visitors

Mobile Visitors

- June 2010 - 2.37%
- June 2011 - 8.75%
- June 2012 - 13.33%
- June 2013 - 18.00% (Projected)

Growth in Utah Online Services: 2001-2012

Social Media Matters

“Social media accounts
for one of every six
minutes spent online
In the US.”

- Sarah Evans

Where do Web metrics
come from?

Is any of this stuff free?

Analytics Web Metrics

Website Usability (Pageviews, Time on Site, Click Maps/Paths)

Traffic Sources (Referral Sites, Search Engines, Direct Searches)

Visitor Profiles (Keywords, Content Groupings, Geography, Time of Day)

Conversion Statistics (New Visitors, Returning Visitors, Unique Visitors, Abandonment, Bounce Rates)

Web metrics inform
design as a basis for
getting results!

Results: Services Utilization

- 10,481,154 Job Referrals
- 6,091,478 Motor Vehicle Records Reports
- 3,341,042 Business Entity and UCC
- 2,315,826 Professional License Verifications
- 1,061,067 Vehicle License Renewals
- 31,115,092 Total Transactions in 2012

Results: Cost Savings

- \$ 3.91 Average Online Transaction Cost
- \$17.11 Average Offline Transaction Cost
- \$45,911,391 Five Year Savings for 9 high use services
- Services are self funded with limited tax \$\$
 - *University of Utah Cost Study 2012*

Results: Awards / Customer Satisfaction

- Best of the Web (4 times)
- Webby, GovMark, IMA, WMA, Best of State
- More than 85 awards for design, marketing, and technical innovation.
- International awards and recognition as one of the world's best government sites.
